Education

University of California, Davis, B.Sc. in Computer Engineering — Sep 2025 – Present

Chabot College, AS in Liberal Arts of Science — Aug 2022 - June 2025

- **Coursework:** Engineering Design & Analysis, Object Oriented, Data Structures and Algorithms, Web App Translation, Circuits.

Awards & Certifications

- S-Stem Scholarship.
- Most Creative GitHub Award – Chabot Hackathon (2023).
- Altium Designer PCB Design Certificate — **View Certificate**

Skills

- **Programming:** HTML, Typescript, MATLAB, C++
- **Framework:** Ionic, Arduino, Shapr3D, VS Code, Terminal, Fusion 360
- **Collaborative:** Teamwork, Communication, Positive Attitude
- **Intuitive:** Problem Solving, Document Review, Research Skills
- **Lab:** Soldering, Oscilloscope, Multimeter, Breadboarding

Experience

CNC Machining Operator, RIVCUT LLC – CA — June 2026 – Present

- Operate 3-axis CNC milling machines to manufacture precision components according to engineering drawings.
- Set up cutting tools and establish work offsets (G54) using edge finders to ensure machining accuracy.
- Perform workpiece alignment and setup for multi-operation machining processes (OP1/OP2).
- Read and interpret CNC G-code to verify machining operations and prevent tool collisions.

Lab Research Intern, Personalized Health and Assistive Technologies Laboratory (PHAST Lab) – San Francisco State University, CA — June 2025 – Aug 2025

- Building the robot hardware
- Using terminal to set up the environment for the robot
- Translating the ios app into web-based version
- Reading Human Robot interaction research papers

Teaching Assistant Chabot College – Hayward, CA — Aug 2023 – Dec 2024

- Peer tutor
- Assignment Grading
- Creating game challenges for students to earn extra credit and enhance their engagement in class.

Projects

CARMEN Web App – TypeScript, Ionic, Raspberry Pi — Project link

- Developed web-based math and color games for an assistive social robot to support interactive learning.

Automated HVAC Prototype – Arduino, temperature sensor — Project link

- Built a prototype that monitors vehicle cabin temperature and controls HVAC operation, with an on/off switch.

Door Sensor – Reed switch, Shapr3D, 3D printing — Project link

- Designed and assembled a battery-powered magnetic door sensor with an audible alert; modeled and 3D-printed housings.

CNC Programming & CAM Simulation – Autodesk Fusion 360

- Configured stock, cutting tools, and work coordinate systems (WCS); practiced 2D facing and contour toolpath simulation for 3-axis CNC milling.

Leadership & Extracurricular Activities

- **Peer Advising** – Chabot College — Aug 2023 - Spring 2025
- **SOAR Day** – Help graduating high school seniors who plan to attend Chabot College for early registration, allowing them to secure their classes ahead of time — Spring 2025
